

## Problem 3 Instruction

Class!

I wanted to enact some clarity and more concreteness for you on Problem 3 to warm you up to the task. I want to address your project at a basic level then move downward in depth as to what I want to see. **I will address the project in 2 layers then: surface - depth.** I will do surface now then get back tomorrow for depth descriptions.

### **SURFACE**

At the surface - I expect you to have an analysis and then redesign of the IST webpage and would hope it is in accordance as much as possible to things mentioned on the IST Webpage contest page (see [http://ist.psu.edu/headlines/2001/0301/hl\\_web031301.html](http://ist.psu.edu/headlines/2001/0301/hl_web031301.html)).

What does this mean in terms of what you turn in? It means that I will look for a

1. writeup - (5-10 pages) that contains (a) a task analysis (b) the design rationale used to change the current design to your group's design AND
2. an IST prototype website of 1 to 3 pages.

*\*Note: You would need to turn in the writeup and to show me your website. Remember this is a GROUP project.\**
